08/01/10 00:00 CST 0 Heat

08/06/10 18:00 CST 0

Hot, humid weather prevailed in early August as high pressure aloft settled over Arkansas. Most reporting stations saw high temperatures rise to 100 degrees or greater, with a few highs reaching 106 to 108 degrees. The only exceptions were some of the higher elevations. Heat indices climbed to 105 to 110 degrees across the north, with a few places seeing heat indices close to 115. Over central and southern Arkansas, heat indices in the 112 to 117 range were common, and a few spots recorded heat indices near 120. A cold front pushed into Arkansas on the 5th and 6th, bringing scattered to numerous thunderstorms and putting a temporary end to the heat wave.

 Source: NWS Storm Survey

Several large trees were knocked down from the Amboy section of North Little Rock across the Levy area into the Park Hill neighborhood. Two of the trees fell on houses. One tree fell on two cars and knocked down a street light pole.

Unusually hot, humid weather prevailed in early August. Late on the afternoon of the 2nd, an isolated severe storm developed along an old frontal boundary.

Lightning stuck Little Rock's central communications center, disabling phone equipment for 911 and 311, some police radio channels, and the city's business phone lines and voice mail system. It took about 2 1/2 hours to restore the radio channels and 6 hours to restore 911. Some of the other repairs took as long as 2 days.

A cold front moved into Arkansas from the north on the 5th, triggering scattered to numerous showers and thunderstorms. Some of the storms became severe and produced locally heavy rain. The remnants of the front continued to touch off storms from the 6th through the 8th, although the storms were less numerous on these days.

Direct Fatalities: M16BF

After a brief break in the heat, high pressure built back into the area, with a new heat wave beginning on the 8th. At the start of the heat wave, most high temperatures ranged from the mid 90s to around 100. By the time the heat wave peaked on the 14th, most highs ranged from the upper 90s to 108. Throughout the heat wave, heat indices ranged from 105 to 115 in most locations, but a few spots reached the 116 to 119 range. The passage of a cold front on the 15th and 16th brought temperatures down, with most areas dropping back close to normal for mid-August.
